Location: Ahmedabad, Gujarat.

Professional Summary

Experienced and results-driven .NET Developer with 3 years of professional experience, including a 6-month internship in designing, developing, and maintaining scalable web applications using .NET Core, C#, MVC, RESTful APIs, and MS SQL Server. Proven ability to deliver clean, efficient, and maintainable code, with strong problem-solving skills and a focus on performance and security.

Technical Skills

- **Languages:** C#, SQL, JavaScript, TypeScript
- **Frameworks & Libraries:** .NET MVC, .NET Core, Angular, Blazor, Web API, Entity Framework Core, LINQ
- **Database:** Microsoft SQL Server
- **Tools:** Git, GitLab, Azure DevOps, CI/CD
- **Concepts:** OOPS, RESTful APIs, Microservices Architecture, Agile Methodology.

Professional Experience

Software Developer | Xelentor Technologies Pvt. Ltd. | Apr 2025 – Present

- Designed, developed, and maintained scalable web applications using .NET Core, MVC, Razor Pages, and SQL Server.
- Created and integrated Telerik Reports to deliver interactive and data-driven business reports.
- Developed RESTful APIs, improving data retrieval speed by **30%** and supporting high-traffic usage.
- Collaborated with cross-functional teams to define, design, and ship new features.
- Implemented CI/CD pipelines in Azure DevOps, reducing deployment time by **50%** and minimizing release errors.
- Enhanced application performance and security, reducing page load time by **40%**

Junior Software developer | Anamya Tech LLP. | Apr 2024 - Mar 2025

- Developed responsive web applications using Angular and .NET MVC.
- Optimized SQL queries, reducing response time by **35%** and improving database efficiency.
- Implemented JWT authentication, securing user sessions and reducing unauthorized access incidents.
- Built features like OTP login, Forgot Password, and Email/SMS notifications to enhance user engagement.
- Used Git, GitLab for version control and collaborative development.

Web Developer Intern | Zetrixweb Infotech LLP | Oct 2023 - Mar 2023

- Assisted in developing web modules using ASP.NET MVC and Angular.
- Fixed bugs and improved UI responsiveness across devices.
- Supported database updates and basic SQL query optimization.
- Learned and applied Git for version control and team collaboration.
- Participated in code reviews and followed coding standards.

Project Domains

- Mass Elemental (Real Estate)(.net Core)
- EHA Soft (Document management)(.net core)
- LMS (Learning management System)(Angular)
- Habitus Health (Health and safety management)(Blazor)

Roles and Responsibilities

1. Mass Elemental (Real Estate)

- Designed and implemented a reporting module using Telerik Reports for analytics and insights.
- Created optimized SQL queries and stored procedures for data aggregation and reporting.
- Configured CI/CD pipelines to automate deployment processes and improve release efficiency.

2. LMS (Learning Management System)

- Built an application structure using Angular 19 for a responsive and modern user interface.
- Integrated RESTful APIs for real-time communication between the front end and backend services.
- Enhanced UX/UI for better accessibility and performance across devices.

3. EHA (Document Management)

- Developed backend modules for role-based access control and permission management.
- Created Telerik reports to visualize user data and document activities.
- Improved data security and compliance by restricting unauthorized data access.

4. HabitUsHealth (Health and Safety Management)

- Built fully reusable components in Blazor (.NET 8) and multiple layout support.
- Implemented client/server-side filtering with clean architecture and JS interop integration.
- Ensured consistent UI using scoped CSS, component isolation, and design standards.

Education

Master of computer application(MCA)

CGPA: 9.3

Silver Oak University,Ahmedabad,

Activities & Interest

- Technology exploration
- Problem-solving
